

Job & Person Specification

Job Title:	Marine Engineering Technician (Mobile)	Department:	Marine
Reporting to (Job Title):	Engineering Manager	Location:	Various

Job Purpose

A business critical role to develop, drive and achieve Marine Engineering Excellence. This role is responsible for the maintenance and reparation of shore and sea based Marine assets.

Person Specification – Essential

- Qualified Engineer/Technician – Marine/ Mobile Plant/Automotive or similar discipline.
- Sound understanding in the importance of health and safety.
- Familiar with maintenance of both petrol and diesel engines.
- Knowledge of hydraulic systems.
- Familiar with 12/24v electrical systems.
- Familiar with the maintenance of small to medium sized vessels.
- Familiar with a range of ancillary plant such as material handlers, generators, compressors and pumps.
- IT proficient, knowledge of Excel and Word.
- A flexible approach to working hours and the ability to work in a changing fast-paced environment
- Experience of liaising with external contractors and maintaining good working relationships.
- A good team player, with strong attention to detail and able to work under own initiative

Person Specification - Preferable

- Marine background
- Basic fabrication skills
- Basic electrical skills (240v)

Role Accountabilities

- **Compliance** – Ensure compliance of all Company policies and procedures. You will be responsible for maintaining high standards of legislative compliance across certified bodies.
- **Health & Safety and Housekeeping** – You will participate in weekly toolbox talks and perform all duties in a safe manner whilst working as a team player. You must ensure a safe working environment exists for working practices and for all employees on site, actively keeping all working areas clear and clean.
- **Monitoring and Recording** – You will carry out and prioritise works via our CMMS system, along with recording all tasks and parts/material usage on our CMMS system. It is your responsibility to keep accurate records of maintenance and purchasing.
- **On-call and Emergencies** – You will participate and take part in an out of hours rota as required. You will respond to emergencies as required and support the emergency services.

Organisation Chart

We Prioritise Provenance - We are proud of our provenance, bringing together our cultural differences to raise sustainable, nutritional salmon, with full value chain integrity.

We Are Passionate – We celebrate our passion for our business and our people, who go above and beyond to accomplish our shared purpose, together. This is our competitive advantage.

We Are Respectful - We respect and care for our natural environment, each other, our employees and our local communities in which we live and work – sustainability is at the heart of everything we do.
